

Black & Decker® SPACEMAKER™ System

Product Description:

Black & Decker® SPACEMAKER™ appliances are distinctively designed to save counter space due to their unique under cabinet mounting system. Introduced in 1980, the innovative line of SPACEMAKER™ products has been revamped to offer consumers two very different looks – the SPACEMAKER™ Plus Line and SPACEMAKER™ Traditional Line – with the same high-quality, high-performance appliances for which Black & Decker® is known.

SPACEMAKER™ appliances keep the focus on the food and the fuss off the kitchen counters. Designed to reduce outlet use, four SPACEMAKER™ appliances can be powered with just two outlets: you can plug the mini food processor/grinder or can opener into the coffeemaker or toaster oven. For those who already have SPACEMAKER™ appliances, an upgrade will be effortless with similar mounting holes.

The full SPACEMAKER™ line includes a coffeemaker, mini food processor/grinder, can opener and toaster oven. Each product is sold separately to give the consumer the freedom to choose the products they want and need in their kitchen.

Each SPACEMAKER™ appliance includes the following convenient Black & Decker® features:

- Coffeemaker: Save-A-Plug™ Outlet, Sneak-A-Cup® interrupt feature, auto shut off and simplified programming
- Mini Food Processor/Grinder: Two different removable blades and containers, pulse control
- Can Opener: Bottle opener, knife sharpener, bag cutter, swing open door
- Toaster Oven: Large 9" pizza capacity, simple easy-to-use controls

Availability:

The SPACEMAKER™ lines are available now at Target, K-mart and Sears in the United States and will be available in 2009 at Bed, Bath and Beyond in the United States and Sears and Canadian Tire in Canada.
